

Current Plan Review Process for CSS, WET, CAP/IT

- MHSOAC approves all written comments to DMH through a consent agenda
- No provision for MHSOAC to approve review criteria and review tools each review team needs to develop comments
- All Plans sent to Commissioners, who may participate in any review

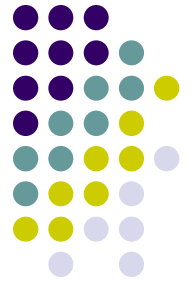

Advantage

- All plans for every MHSA component are reviewed and approved by the MHSOAC in a public meeting

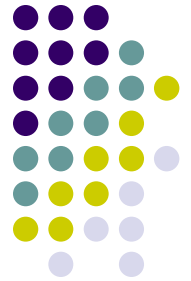

Disadvantage

- Untimely responses to DMH because comments for every plan would be calendared on the consent agenda at the next meeting

MHSOAC Proposed Plan Review Process for CSS, WET, CAP/IT

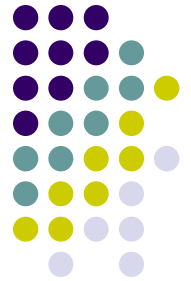

- MHSOAC adopts review criteria and review tools for CSS, WET, and Cap/IT
- All Plans sent to Commissioners, who may participate in any review
- Staff write comments that reflect these criteria and that reflect the work of the review team
- Review team forwards comments to DMH for inclusion in their plan review process

Recommendation:

- Adopt the proposed process
 - MHSOAC approves review criteria and review tool before the Review Team meets
 - Review team for each component has the autonomy to develop comments and forward them to the DMH, based on the MHSOAC-approved review criteria and tool

Benefits of Proposed Process

- MHISOAC ensures the direction on overall approach to review and comment on CSS, WET, and Cap/IT components
- No lengthy consent agenda to review and approve CSS, WET and Cap/IT comments
- DMH receives MHISOAC comments in a timely manner
- MHISOAC staff can participate on the DMH Review Team with valid comments, rather than provisional
